Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09 June 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

1. Claims 1, 3, 6 and 10 are rejected under 35 U.S.C. 102(e) as being anticipated by Sasaki-6,936,061.

As to claims 1 and 10, Sasaki-061 (Figs. 2A-3B) discloses tubular member 2, partition member 8, 1st shaft 6, 2nd shaft 5, jaws 12 and 14, base member, 1st connection member 21, supporting pin 19, 2nd connection member connecting 1st connection 21 and 1st shaft 6, 1st operation control portion 4, 2nd operation control portion 39 for controlling the pivot of the jaws substantially as recited in the claims.

As to claim 3, the loop handles of Sasaki-'061 can be considered as fixed or movable with suitable reference frames.

As to claim 6, tubular member 2 can be considered as a rotational knob for rotating the tubular member 2 about the axis of first shaft 6.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-5, and 7-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sasaki-6,936,061 in view of Landymore et al (1,359,391).

As to claims 4-5, Sasaki-6,936,061 discloses substantially all limitations recited in the claims, except for a control knob and a screw mechanism for controlling the pivot of the jaws. However, Landymore-'391 (Fig. 1) disclose a coupling device with knob 5 and a screw mechanism having thread 6 for adjusting the length of the device. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide similar coupling mechanism for element 43 of Sasaki-'061 device so as one can adjust the length of element 43 and therefore control the pivot of the jaws.

As to claims 7-9, Sasaki-6,936,061 discloses substantially all limitations recited in the claims, except for the arrangement of the knobs' positions and diameters as recited in claims. However, it would have been obvious to one of ordinary skill in the art to

provide a Sasaki-'061 device to have the limitations as claimed as these configuration are just design choices.

Allowable Subject Matter

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vy Q. Bui whose telephone number is 571-272-4692. The examiner can normally be reached on Monday-Tuesday and Thursday-Friday.
